- Developed a Hotel website CRUD application using the Django framework that managed the food menu/room service provided at the Hotel. Other applications include a personal phone book with ADD, EDIT, DELETE in a GUI using Tkinter. A file transfer utility which logged last transfer in SQLITE3 and allowed the user to transfer all created and modified files into selected directories from the past 24 hours.

JavaScript/HTML/CSS:

- Developed an Interactive TicTacToe game. Developed a Pizza Application that accepts user input to customize your pizza order. It then calculates a running total that displays the itemized order and price for the customer.

MS SQL:

- Developed relational database for library management system cataloguing books, authors, publishers, borrowers, branches and branch inventory.

Advanced Waste:

- Helped oversee, manage, and implement a complete change of our business model. Were able to streamline tasks, update computer hardware and software, improve customer relations, and became more efficient. Doubled revenue within a year and have increased each year.
-

Non-Technical Skills:

- Problem Solver
 - Open to Feedback
 - Management Experience
 - Willingness to Learn
 - Dependable
 - Analytical
 - Communication Skills
 - Time Management
 - Leadership Skills
 - Team Player
 - Likeable
 - Versatile
-

Professional Experience:

The Tech Academy

June 2020 – July 2020

Software Developer Internship:

Worked with a team developing an interactive user-friendly website for managing the content and productions for a theater/acting company. This website was meant to be a content management service for users who want to easily manage their website.

- Utilized C#, MVC, Entity Framework, JavaScript, jQuery, and CSS.
- Utilized Agile methodology, using the Scrum framework.
- Collaborated with a team of developers employing Git and Azure DevOps version control systems.

Developed an application to manage and store a user's workout and weightlifting log utilizing Python on the Django Framework.

- Utilized Python, Django, JavaScript, jQuery, CSS, Bootstrap, and SQLite.
- Collaborated with a team of developers employing Git and Azure DevOps version control systems.
- Gained experience problem solving, fixing bugs, and cleaning up code.

Advanced Waste

October 2012 – Present

Office Manager/Computer Management:

Tasked with many different roles, from providing technical support and maintenance of computer hardware and software to management, customer relations, and more.

Responsibilities/Duties:

- Provided technical support.
